Subject: Tittabawassee River Segment 6&7 Comment

Follow Up Flag: Follow up
Flag Status: Flagged

Hi Mary,

I received a phone call this afternoon from a lady currently living in a Midland Nursing Home. She had read about the cleanup from a Midland Daily News article dated 11/12/2018 (<https://www.ourmidland.com/news/article/EPA-river-cleanup-public-comment-open-until-Nov-13383647.php>) and wanted to submit a comment but said she could not really write it. I went ahead and typed out what she told me and read it back to her to make sure I typed it accurately. I recognize we don't typically take over-the-phone comments, but given her need for accommodation, I'm hoping we can make this exception and submit the following for comment on Segments 6 and 7:

11/13/2018 – 3:30 pm

████████████████████
MediLodge of Midland Nursing Home
4900 Hedgewood Drive
Midland, MI 48640

I would like to see all that work done, very happy to know that they might do that.
It is important to me to stop the spread of dioxins to fish, that is very important. Also, this work will reduce the level of dioxin contaminated river bank soils in the Tittabawassee River and also reduce a large amount of similar chemicals to dioxin that are cancer-causing.

Diane Russell
